

ATTENTION RESIDENTS

THE ACMUA WILL BE PERFORMING OUR
HYDRANT FLUSHING PROGRAM

MARCH 28, 2022– MAY 6, 2022

INCLUDES ALL HYDRANTS IN WARDS 1-6

RESIDENTS IN THESE AREAS MAY EXPERIENCE
DISCOLORED OR CLOUDY WATER AND OR LOW WATER
PRESSURE DURING THE FLUSHING PROCESS. IF YOU
EXPERIENCE DISCOLORED OR CLOUDY WATER,
RUN THE WATER IN THE BATH TUB UNTIL IT'S CLEAR TO
CORRECT THIS ISSUE.

THANK YOU

THE ATLANTIC CITY MUNICIPAL UTILITIES AUTHORITY

PUBLIC NOTICE
ACMUA
2022 SPRING WATER MAIN/ HYDRANT FLUSHING

The Atlantic City Municipal Utilities Authority will be conducting our annual hydrant flushing program beginning the Week of **March 28, 2022**, and continuing through the first Week in May **2022**. The ACMUA will perform this procedure from **7am to 5pm Monday - Friday**. The hydrant flushing activity will be performed on all hydrants throughout Wards 1-6. This will involve opening the hydrants and allowing the water to flow freely from the hydrant. There may be areas of standing water while the excess water is collected into the storm drain system. While this activity is being performed you may experience discolored or cloudy water. This is perfectly normal and can be corrected by simply running the water in the bath tub until it runs clear.

The Authority recommends that its customers refrain from scheduling the use of Laundry Machines without previously running their Tap Water a sufficient period of time to confirm that the water in their service line is not discolored prior to use for drinking, cooking or other consumptive type uses.

The Authority will have the customer service staff available for special questions the public may have by calling **609-345-3883 Ext. 210**

The ACMUA thanks you in advance for your cooperation while we perform this necessary function to insure the safety of all residents.
