

# Atlantic City Municipal Utilities Authority

## APPLICATION FOR CHANGE IN WATER METER SIZE

Date: \_\_\_\_\_

Account No. : \_\_\_\_\_

Property Location: \_\_\_\_\_

Owner Name: \_\_\_\_\_

Owner Phone: \_\_\_\_\_ Owner Email: \_\_\_\_\_

I, \_\_\_\_\_ (OWNER/AGENT) of the property herewith request the ATLANTIC CITY MUNICIPAL UTILITIES AUTHORITY to change the size of the water meter presently serving this account from a \_\_\_\_\_ INCH WATER METER to a \_\_\_\_\_ INCH WATER METER. I fully understand and have been advised by a representative of the ATLANTIC CITY MUNICIPAL UTILITIES AUTHORITY that the change in the size of the water meter may result in reduced water pressure and reduced capacity in the water service to this account.

I am submitting herewith the Engineer Certification/Letter and the required fee for the requested change in the size of the water meter service for the above account in the amount of \$\_\_\_\_\_.

The reduction of a water meter size shall be authorized and completed by Authority Personnel.

\$200.00 for a resize of 5/8", 3/4" or 1" meter plus the cost of the meter, labor, equipment, and materials plus 15%

\$250.00 for a 1-1/2" meter plus the cost of the meter, labor, equipment, and materials plus 15%

\$300.00 for a 2" meter plus the cost of the meter, labor, equipment, and materials plus 15%

\$300.00 for larger than 2" plus the cost of the meter, labor, equipment, and materials plus 15% (A deposit satisfactory to the Authority is required with this form, which will be applied towards the final bill)

Any increase in meter size shall be completed by Authority personnel on a time and material basis plus 15%.

PLEASE NOTE: All meter sizes referenced above are the existing meter sizes before the reduction. The size of the new meter needs to be appropriate for the peak flow of the building, which needs to be certified by the Certified Engineer.
